1.7 Proposition. V is naturally a representation of GL(V). It is called the standard representation of GL(V). The following corresponds to Prop. 1.1, involving the same abuse of language. 1.8 Proposition. A representation of Gon V â€œis the same asâ€• a group homomorphism from Gto GL(V). Proof.

30 Graphical Representations of Data Visualization techniques are ways of creating and manipulating graphical representations of data. We use these representations in order to gain bet-ter insight and understanding of the problem we are studying - pictures can convey an overall message much better than a list of numbers.

30 Graphical Representations of Data
Representation theory was born in 1896 in the work of the German mathematician F. G. Frobenius. This work was triggered by a letter to Frobenius by R. Dedekind.

Introduction to representation theory
The main purpose of this paper is to introduce an integral representation of some k -confluent hypergeometric functions and k -hypergeometric functions so that we can get the usual integral representations discussed in [2, 3], by
