We deal in this work with quantitative results in the pointwise approximation of functions by positive linear functionals and operators. One of the main objectives is to obtain estimates for the degree of approximation in terms of various types of second order moduli of continuity.

Statistical Fuzzy Approximation Theory by Fuzzy Positive Linear Operators ... aspects of approximation theory settings. An application of this result is ... we present an example of fuzzy positive linear operators by using fuzzy Bernstein polynomials, which indicates that the results obtained in this section are stronger than the classical case.
