Gastrointestinal. A methanol extract of African mango exhibited dose-dependent inhibition of indomethacin-induced gastric ulceration in mice. Raji 2001 The antiulcer activity of several doses of the extract was comparable to that of cimetidine (50 mg/kg), and the extract also reduced gastric acid secretion and increased mucous secretion. Another animal study in mice administered African mango ...

Improvements in physicochemical properties can be achieved by altering the physical forms of a given compound such as polymorphs, solvates, amorphous, salts, cocrystals, and/or hydrates, etc. Singhal et al. well summarized the physicochemical properties shown by different polymorphs with examples. The physicochemical properties that can be altered by choosing different polymorphs are ...

If you are in the market for a home battery and are tempted to buy a Powerwall, then I urge you to also consider the new range of LG Chem batteries announced last week. Whilst LG have been unable to compete with Elon Musk for mainstream media coverage, the LG Chem RESU, or Residential Energy Storage ...

Nitrous oxide is a colorless, sweet-tasting gas. It is also known as "laughing gas". Continued breathing of the vapors may impair the decision making process.

### Nitrous oxide | N<sub>2</sub>O - PubChem

The etiology of non-alcoholic fatty liver disease (NAFLD), the most common form of chronic liver disease, is poorly understood. To understand the causal mechanisms underlying NAFLD, we conducted a multi-omics, multi-tissue integrative study using the Hybrid Mouse Diversity Panel, consisting of  $\approx 100$  strains of mice with various degrees of NAFLD.

### Integration of Multi-omics Data from Mouse Diversity Panel

The study was conducted in the Tete Province, in central Mozambique (figure 1).The Tete Province is crossed by the Zambezi River from northeast to southwest and is landlocked between Zambia, Zimbabwe, Malawi and the Mozambican provinces of Manica, Sofala and Zambezia.

### The impact of charcoal production on forest degradation: a

Colloidal gold is a sol or colloidal suspension of nanoparticles of gold in a fluid, usually water. The colloid is usually either an intense red colour (for spherical particles less than 100 nm) or blue/purple (for larger spherical particles or nanorods). Due to their optical, electronic, and molecular-recognition properties, gold nanoparticles are the subject of substantial research, with ...

Oxygen is a chemical element with symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table, a highly reactive nonmetal, and an oxidizing agent that readily forms oxides with most elements as well as with other compounds.By mass, oxygen is the third-most abundant element in the universe, after hydrogen and helium.At standard temperature and pressure, two atoms ...

Loss of estrogen from menopause increases the risk of developing metabolic diseases. Torres et al. show that  $^{17}\beta$ -estradiol (E2) localizes to mitochondrial membranes consistent with whole-body E2 status. The presence of E2 decreases microviscosity, which improves bioenergetic function, thus offering a biophysical mechanism by which E2 influences energy homeostasis.
