Elementary algebra is the most basic form of algebra. It is taught to students who are presumed to have no knowledge of mathematics beyond the basic principles of arithmetic. In arithmetic, only numbers and their arithmetical operations (such as +, ^, —, ·) occur. In algebra, numbers are often represented by symbols called variables (such as a, n, x, y or z).

Elementary algebra encompasses some of the basic concepts of algebra, one of the main branches of

mathematics. It is typically taught to secondary school students and builds on their understanding of arithmetic. Whereas arithmetic deals with specified numbers, algebra introduces quantities without fixed values, known as variables. This use of variables entails a use of algebraic notation and an ...
