Digital Image Processing Algorithms and Applications [Ioannis Pitas] on Amazon.com. *FREE* shipping on qualifying offers. A unique collection of algorithms and lab experiments for practitioners and researchers of digital image processing technology With the field of digital image processing rapidly expanding

Digital Image Processing Algorithms and Applications

In computer science, digital image processing is the use of computer algorithms to perform image processing on digital images. As a subcategory or field of digital signal processing, digital image processing has many advantages over analog image processing. It allows a much wider range of algorithms to be applied to the input data and can avoid problems such as the build-up of noise and signal ...

Digital image processing - Wikipedia

In computer graphics and digital imaging, image scaling refers to the resizing of a digital image. In video technology, the magnification of digital material is known as upscaling or resolution enhancement.. When scaling a vector graphic image, the graphic primitives that make up the image can be scaled using geometric transformations, with no loss of image quality.

Image scaling - Wikipedia

IEEE Transactions on Image Processing focuses on signal-processing aspects of image processing, imaging systems, and image scanning, display, and printing.

IEEE Xplore: IEEE Transactions on Image Processing

Image Processing Toolbox[®] provides a comprehensive set of reference-standard algorithms and workflow apps for image processing, analysis, visualization, and algorithm development.

Image Processing Toolbox Documentation

In computer vision and image processing the concept of feature detection refers to methods that aim at computing abstractions of image information and making local decisions at every image point whether there is an image feature of a given type at that point or not. The resulting features will be subsets of the image domain, often in the form of isolated points, continuous curves or connected ...

International Journal of Pattern Recognition and Artificial Intelligence is seeking original and unpublished manuscripts for a Special Issue on Facial Image Processing and Analysis, scheduled for publication in 1st Quarter 2009.

IJPRAI Special Issue on Facial Image Processing and Analysis

Comprehensive introduction to 3D deconvolution microscopy. • Description of standard algorithms of deconvolution. • Presentation of the Java open-source software: DeconvolutionLab2. Benchmark on open reference datasets.

DeconvolutionLab2: An open-source software for

I have uploaded a great many image processing demonstrations over the years, but todayâ€™s project â€œgrayscale conversion techniques â€œ is actually the image processing technique that generates the most email queries for me. Iâ€™m glad to finally have a place to send those queries! Despite many requests for a grayscale demonstration, I have held off coding anything until I could really ...

Seven grayscale conversion algorithms (with pseudocode and

RegiStax 6 moving forward The development team worked hard and has tested many new versions. One of the most recent developments has been that we have now prepared the code to work also under multi-core environments which can speed up processing a great deal.
