Interaction. The most exciting, yet also most imposing aspect of computer science and robotics happens when human and machine meet. In our ambition to tackle this challenge, we follow and support the paradigms of natural interaction and human-centric automation with classic and spatial interfaces for close collaboration. This facilitates the proliferation of digitized environments, interactive ...

Intelligent design (ID) is a pseudoscientific argument for the existence of God, presented by its proponents as "an evidence-based scientific theory about life's origins". Proponents claim that "certain features of the universe and of living things are best explained by an intelligent cause, not an undirected process such as natural selection." ID is a form of creationism that lacks empirical ...

Intelligence To be intelligent you first have to know what being Intelligent is. And you also have to know what being ignorant is. Ignorant is just another word for "Not knowing". But not knowing is not always obvious or clearly understood. That's because learning is not fully understood. The more you learn the more you should realize what you didn't know.
