ST, the Internet Stream Protocol, is perhaps the oldest communication protocol designed for speech communication over packet-switched networks. It has been developed by Danny Cohen, Estil Hoversten, and Jim Forgie of the M.I.T. Lincoln Laboratory. Jim Forgie is the author of the ST protocol specifications completed in September 1979 [Forg79].

TCP is a connection oriented protocol and offers end-to-end packet delivery. It acts as back bone for connection.It exhibits the following key features: Transmission Control Protocol (TCP) corresponds to the Transport Layer of OSI Model. TCP is a reliable and connection oriented protocol. TCP offers: Stream Data Transfer. Reliability.
