This lecture completes the introduction of classes by showing a way to implement user-defined iterators. It then discusses simulation models, and illustrates some of the ideas underlying simulations modeling by simulating a random walk.

Introduction to Simulation and Random Walks | Unit 2

Computer programming is the process of designing and building an executable computer program for accomplishing a specific computing task. Programming involves tasks such as analysis, generating algorithms, profiling algorithms' accuracy and resource consumption, and the implementation of algorithms in a chosen programming language (commonly referred to as coding).
